Conclusion.....  
Key Takeaways .....

## INTRODUCTION

The MTM White Paper is not an offer or solicitation to sell securities. The MTM White Paper is intended solely to describe the MTM token and matters related to its development and introduction into commerce. The statements contained in this White Paper are exclusively opinions and forward-looking statements, are made only as of the date written above and are not intended to be relied on by any person in connection with their determination to purchase or sell MTM Coin.

All offers to purchase MTM Coin will be made solely to persons legally permitted to purchase MTM Coin and will be pursuant to definitive documents and agreements clearly labeled as such and subject to all terms, conditions, disclosures, qualifications and risk factors contained therein.

MTM Coin enables individuals and organizations to utilize a transparent digital currency with a physical value underpinned and backed by independent audited assets and locked liquidity on pancakeswap.

MTM holders will be able to make instant payments and transfers anonymously, and instantly, anywhere in the world, and their data will be stored on the Binance blockchain, making it indestructible, theft-proof, and impossible for anyone else to know without their knowledge and approval.

## PRODUCT/SERVICE/METHODOLOGY

MTM is committed to working with domestic and global governmental agencies, financial institutions, traders and users of commodities to develop protocols to help facilitate MTM adoption as a leading digital currency.

MTM fully supports the use of a public blockchain as a means to facilitate private exchange and fundamentally believes that blockchain technology will permeate the transfer of data and value over the coming years and decades.

The end goal, which underpins MTM inherent role as a store of value, is to make MTM easy to use and hence attractive to token holders, as well as easy to accept and convert, and hence attractive, to merchants.

## KEY FINDINGS

While MTM is committed to enabling the pseudonymous exchange of value, it will do so in compliance with all regulations governing such transfers.

Once a MTM Coin token has been issued, it can be held, transferred or exchanged, subject to applicable law, either in whole or in part, in the same manner as Bitcoin, Ether or other digital currencies.

Users can also transact and store MTM Coin with any Binance Smart Chain enabled wallet. MTM will promote and encourage integration into other exchanges, wallets and merchants and will encourage them to collaborate to integrate MTM as a surrogate for traditional fiat payment methods.

Symbol – MTM

Decimals – 9

Network- Binance Smart Chain

## CONCLUSION

At present, ordinary consumer transactions in digital currencies have had significant appeal but limited adoption. This is due to a variety of factors, the most significant of which is the absence of a practical and ubiquitous solution which enables a consumer to pay for goods and services in digital currency and allow a vendor to receive immediate and guaranteed payment for a fixed amount of local fiat currency.

MetaMoney Token will develop a partial but workable and highly effective solution to this problem by partnering with Local and International businesses, allowing them to adopt MTM as a form of payment for selected services or products.

One of the best ways we can continue to see less volatility in the world of digital currency is with the adoption of more businesses and individuals using it. Here we are in 2021 and adaptation towards cryptocurrency has significantly been on the rise since 2014. It's no longer a question of if market demand will accept this form of payment, it's simply a matter of how fast and how soon it will happen globally.

MTM is assembling a world-class team of management, service providers, and advisors across the full spectrum of support, compliance, technology development and platforms, product development, audit, exchanges, marketing, and the Public Offering process, etc.
